Role Description

We are seeking a creative and motivated Game Developer Intern to join our team. The ideal candidate will assist in the conceptualization, design, and development of games tailored to train eye movements in young children, and this work will be outsourced to a 3rd party developer. This is a opportunity to gain hands-on experience in game development while contributing to a meaningful educational project.

Key Responsibilities

- Collaborate with our team to brainstorm and conceptualize game ideas focused on eye movement training.
- Develop game mechanics and features that are engaging and effective for preschool-aged children.
- Design and implement game levels, characters, and interactive elements.
- Conduct user testing and gather feedback to refine and improve the game.
- Work closely with educators and other professionals to ensure the game meets educational goals.
- Assist in troubleshooting and debugging issues as they arise.
- To also assist the Management in other general duties when needed.

Qualifications

- Currently pursuing or recently completed a diploma/degree in Game Design, Computer Science, or a related field.
- Strong passion for game design and development.
- Experience with game development platforms (e.g., Unity, Unreal Engine).
- Knowledge of programming languages such as C#, C++, or JavaScript.
- Creative mindset with the ability to think outside the box.
- Excellent problem-solving skills and attention to detail.
- Strong communication skills and the ability to work collaboratively in a team environment.
